## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 17, drawn to an antibody.

**(Note, if this group is selected applicant is further requested to select two SEQ ID NOs from 2, 4 and 6, in which one represent  $V_H$  and another represent as  $V_L$  as recited in claim 3 to be examined on the merits, see below for explanation)**

**Upon election of Group I, Applicant is additionally required to elect two sequences as recited in the claim 3. This requirement is not to be construed as a requirement for an election of species, since each sequence recited in alternative form is not a member of a single genus of invention, but constitutes an independent and patentably distinct invention. Each of the sequence has different genetic structure and the search of each structure would be burdensome to search in both in house and commercial databases.**

Group II, claim(s) 5 and 19, drawn to an antigen and a method for detecting antibodies against HCV.

Group III, claim(s) 6-8, drawn to polynucleotide and a vector and cells comprising the polynucleotide.

Group IV, claim(s) 9-10, drawn to a method for preparing an antibody.

Group V, claim(s) 11, drawn to a pharmaceutical composition.

Group VI, claim(s) 12, 16, drawn to a diagnostic composition.

Group VII, claim(s) 13, 15, drawn to a method for using a composition to prevent the HCV.

Group VIII, claim(s) 14, 15, drawn to a method for alleviating the HCV.

Group IX, claim(s) 18, drawn to an in vitro immunoassay for detecting the presence of HCV glycoprotein E2.

Group X, claim(s) 20-21, drawn to a composition for treating or preventing HCV infection.

Art Unit: 1648

2. The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature of using antibody to recognizing the association of E2/E1 HCV complex is already known in the art as evidenced by Deleersnyder et al. (J. Virology 1997, Vol. 71, pp. 697-704). Deleersnyder et al. explicitly teach to use an isolated monoclonal antibody to recognize the E1/E2 interaction (see abstract).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
